

DESTONER

Model Number: ME-W-3600

PRODUCT DESCRIPTION

The Destoner is designed to remove all dirt and rocks from the product, and is equipped with a stone screen to prevent large rocks from clogging the drain pipe. The Destoner also helps to condition and prepare the nut for cracking. The product flow rate through the machine is adjustable for long or short dwell times in the water. Used by large and small processors, this machine is an important part of the processing line.

SPECIFICATIONS

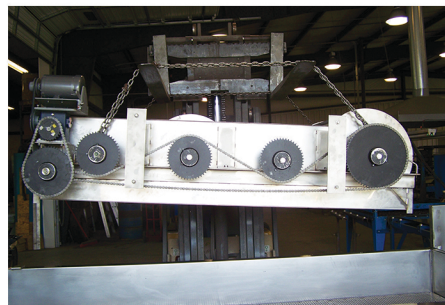

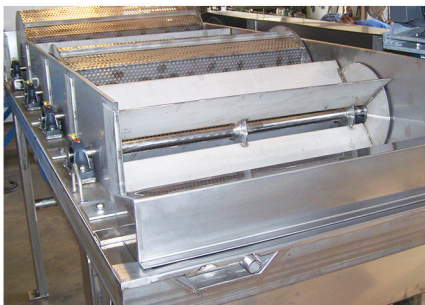

Capacity: The Destoner is capable of moving 267-833 cubic ft per hr.
