

ALUMINUM CUP ELEVATOR

Model Number: ME-ALEL

PRODUCT DESCRIPTION

The Aluminum Cup Elevator is designed to elevate product from one level to another. The 3 elevators in this model line handles product gently and provides superior cleanability. All 3 models have 4", 7", and 10" wide cups. The heavy duty drive mechanism will last for years and is easy to maintain. These elevators start at 6 ft tall and can be ordered in lengths in excess of 20 ft.

SPECIFICATIONS

Capacity: Three models deliver from 102 to 269 cubic ft per hr.

Estimated Crated Weight: Depends upon the elevator dimensions.

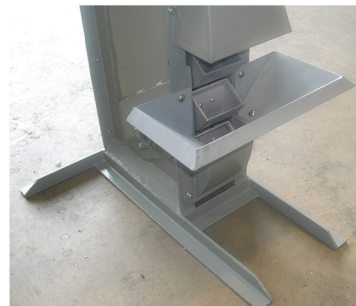

Dimensions: Input Height = 11.1875"

Discharge Height = 19.3125" less than Overall Height.

Width depends upon the model that is ordered.

FEATURES

- Modular construction is sturdy and can be lengthened or shortened in the field.
- Superior lift design virtually eliminates buildup of product under cups.
- All areas of elevator can be accessed for cleaning.
- Rugged commercial quality design
