

SPIRAL LET-DOWN

Model Number: ME-EL18 & ME-EL36

PRODUCT DESCRIPTION

Our Spiral Let-Down is an efficient way to transfer material from a high level to a low level without breaking product. Its great for filling up any container or machine without compromising your product's quality. We offer two different versions, an 18 in. and a 36 in. diameter spiral with a virtually limitless length to fit your material handling needs. Alongside that, our specially designed input head allows you to feed product in from any direction. This eliminates the problems you may encounter with other spiral let-downs.

SPECIFICATIONS
