

PIECE BREAKER

Model Number: ME-PB-14

PRODUCT DESCRIPTION

The piece breaker was designed to break nutmeat peaces rather than cut them. Breaking the nutmeat creates a more desirable “natural looking” piece. The machine has a series of rotating and stationary pins. The adjustable feeder conveys product from the hopper to the pins so the product can be broken. Interchangeable pin assemblies are available depending on the desired piece size. All construction is stainless steel except the pin assemblies which are zinc plated carbon steel, and can easily be recovered with a magnet if they break.

SPECIFICATIONS

Capacity : Capacity varies depending on the starting size and/or the final desired size of the nutmeat.

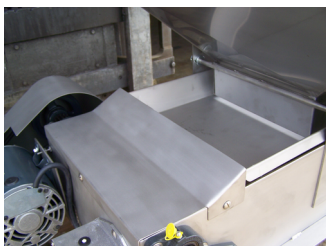

Estimated Crated Weight : Weight in lbs

Dimensions : 36" Width x 42" Length x 28" Height (Without Stand)

36" Width x 42" Length x 70" Height (With Stand)

FEATURES

- Stainless steel construction
- Interchangeable pin assemblies
- Speed adjustment for feed tray
- Long lasting time proven design
- Easy to clean and maintain
